

CHEMISTRY 11
COMMON NAMES FOR CHEMICAL COMPOUNDS

Match the common name on the left with the correct generic or chemical name on the right. (to find this information use chapter 3, the index and glossary of your text)

q vinegar

c coffee whitener

r limestone

d meat preservative

a milk of magnesia

g rust remover

e baking soda

l Nutrasweet

f bleach

j smelling salts

s lye

o quicklime

i aspirin

p diamond

h ruby

b vitamin C

n teflon

k glass

m antipersperant

~~a) magnesium hydroxide~~

~~b) ascorbic acid~~

~~c) aluminum silicate~~

~~d) sodium nitrite~~

~~e) sodium bicarbonate~~

~~f) sodium hypochlorite~~

~~g) sodium phosphate~~

~~h) aluminum oxide~~

~~i) acetyl salicylic acid~~

~~j) ammonia~~

~~k) silicon dioxide~~

~~l) aspartame~~

~~m) aluminum chloride~~

~~n) tetrafluoroethylene~~

~~o) calcium oxide~~

~~p) carbon~~

~~q) acetic acid~~

~~r) calcium carbonate~~

~~s) sodium hydroxide~~
